

I am Katia Maccarone, Managing Director of MAD for Europe, a non-profit organization specialized in vocational education and training, European mobility programs and cultural activities. We operate in the city center of Madrid, offering training programs in multiple areas. I am writing to you as we are interested in receiving interns at our association through the Erasmus+ Traineeship platform.

We are aware of the fact that students can choose to carry out their internship with institutions they are looking for on their own, or with those which are already affiliated with the University of reference. For this reason, we would like to ask you if and how MAD for Europe could be included in the institutions in affiliation with your University, in order to be able to accommodate students and trainees who would like to carry out an educational experience at our center. The activities that a student or recent graduate would carry out at MAD for Europe will include, for example: organization of training programs for European groups; cultural activities; professional visits; recreational activities with the groups accepted by the association, along with others. Each task is shaped taking into account the trainee's attitudes, previous studies and aspirations.

More details about MAD for Europe can be found at: <https://www.madforeurope.org>. Besides, should you be interested in receiving further information about our association, we would be happy to provide it to you as soon as possible.

Sincerely,

Katia Maccarone
